> Choosing a pre-school is one of the most emotional decisions a parent makes. In Ballari, with new schools opening every year, it can also be one of the most confusing. This guide cuts through the noise.

Between the ages of 18 months and 5 years, a child's brain develops at a speed it will never match again. Scientists estimate that nearly **90% of brain development** happens before age 5. The question is not whether pre-school matters — it does, profoundly. The question is: which pre-school in Ballari is ready to honour that responsibility?

At What Age Should You Enrol Your Child in Pre-School?

This is the question parents ask most. Here is a simple, practical breakdown:

Age	Stage	What to Focus On	BOMIS Programme
18 months – 2.5 yrs	Toddler / Play Group	Sensory play, language exposure, socialisation	Pre-School Programme
2.5 – 3.5 yrs	Nursery	Motor skills, vocabulary, early numeracy	Pre-School Programme
3.5 – 4.5 yrs	LKG	Reading readiness, structured play, creative arts	Pre-School Programme
4.5 – 5.5 yrs	UKG	Pre-academics, confidence, peer learning	Pre-School → Primary transition

3 5 above

At **BOMIS Ballari**, our Pre-School programme accepts children from **18 months of age**, ensuring they receive world-class early childhood education right from the start.

5 Things the Best Pre-Schools in Ballari Should Offer

Not all pre-schools are equal. Here is what separates genuinely good schools from those that are merely convenient:

- ✓ **Play-based learning curriculum** — Young children learn through play, not rote memorisation. Any school that makes 3-year-olds copy alphabets all day is doing it wrong.
- ✓ **Trained early childhood educators** — Teachers working with toddlers need specialised training. Ask about qualifications, not just experience.
- ✓ **Safe, supervised environment** — CCTV coverage, childproofed classrooms, secure campus entry, and trained support staff.
- ✓ **Low child-to-teacher ratio** — In a good pre-school, no teacher should be managing more than 10–12 toddlers alone.
- ✓ **Parent communication** — Regular updates on your child's progress, milestones, and activities — not just report cards once a term.

Red Flags: Pre-Schools in Ballari to Avoid

Equally important is knowing what to watch out for:

- ✗ Overcrowded classrooms with no individual attention
- ✗ No structured curriculum — just "free play" with no developmental intent
- ✗ Staff who cannot explain their teaching methodology
- ✗ No safety infrastructure (no CCTV, open entry, unmonitored corridors)
- ✗ Excessive focus on academics for children under 4 years old

Why Early Education Shapes the Rest of Your Child's Life

90%
of brain development happens before age 5

3×
more likely to graduate high school with quality early education

40%
stronger language skills in children attending quality pre-schools

These are not marketing numbers — they come from decades of educational research. The habits of curiosity, social interaction, and structured thinking that a child develops between 18 months and 5 years create the neural pathways they will use for the rest of their life.
